

The comparison between a cure for AIDS and a cure for COVID-19 is striking:

Finding drugs to treat AIDS allowed for techniques to find COVID-19 vaccines much more quickly

The same greed keeping AIDS treatment plans from being implemented are found today in eradicating COVID-19 worldwide

- Corporations look to profit motives.
- Governments have looked to solutions independent of other governments / Corporations

Jeffrey Sachs (United Nations Sustainable Development Solutions Network) in Democracy Now's June 4, 2021 show was interviewed by Amy Goodman.

Mr. Sachs stated the adult population of the world can be vaccinated in one year. The "interested parties" need to meet with the World Health Organization and UN.

- Wealthy Countries buying all vaccines (U.S., U.K., China, India, Russia, European Producing countries)
- Corporations inventing and manufacturing vaccines (AstraZeneca, Pfizer, Moderna, Johnson & Johnson, Merck, Bio-Intech)
- Use of Virtual technology to make it happen
