

THE GOAL - being humane to all people!

Alyson Ball's Presentation - "Immigration - The Basics" may be seen as presented before an audience - prerecorded: ["Immigrations - The Basics" mirroring Ms. Ball's presentation](#) . Town Halls are being planned to update the needs in 2021. Look for the details here soon.

An excerpt from Veterans For Peace Chapter #13 follows. Note the slide at the end of the clip that shows paths to citizenship vs. visitation plans for people entering the U.S. legally. "It is something to keep an eye on for how it changes - . . ." Alyson Ball

[An excerpt from a Veterans For Peace Chapter 13 meeting](#)

In 1976 the bicentennial celebration included the musical 1776. We acknowledge the evil of classism - [Watch it now!](#)

Another documentary - [Doctrine of Discovery](#) shows the Pope's cold hearted judgment against non-Catholic indigenous people.

Previewing the screening of "[TRACES OF THE TRADE - A STORY FROM DEEP NORTH](#)". **Our complicity** is demonstrated. From the Northern Industry **transporting slaves** to the Episcopalian Church investing in ships. Referring to the Slave traders - "They knew it wasn't right - new it was evil but they did it anyway". The argument went out, "we didn't start it! Slavery has been practiced in all of humanity's history". The slaves to molasses to rum industry put the U.S. in a position to control the world - quite literally.

"The wealthy people participated in it."

2021 - as a country & world we still have classism! President Trump tried to continue the oppression of the Black/Brown and Indigenous but it is us the people who need to recognize, "We are as good as we are through moral and ethical decisions ONLY! This past half a century plus has not been moral, has not been ethical and values from "trickle down economics" to "Corporations as people" to "proxy wars" to "wars for oil" to supporting even with weapons those countries who are openly oppressive to their own populations to militarizing our own U.S. police, the derivative must turn from negative to positive. It is not an "inflection point" that we are in. It must be the bottom of a "U" curve representing the worst we are at; the lowest state of affairs our country is in.

"Suffering is **out of sight - out of mind** unless you go to people who are suffering. People are not paid what they were worth." Debts for education that are free to the public other countries (and in Alaska now if you are in the mining industry) must be forgiven especially in this time of Pandemic. 1930's type "TVA" jobs that invest in our future must be provided for each able bodied person as this person is able.

We must realize White Privilege makes us all (as "whites") complicit. Blacks are incarcerated disproportionately to the White population.

Ibram K. Kendi in *HOW TO BE AN ANTIRACIST*, Kendi points out he was brought up to believe he was evil because White Society publicized and lived that false narrative.

Nonviolent lifestyles will instill world peace. The recently deceased Peace Activist, Daniel Berrigan who died 04/30/2016 shortly before his 95th birthday said, "**I do not believe in heroes, I believe in community!**"

Nonviolent Lifestyles = **A more** Peaceful World

Provide clean air, clean water, food, shelter, clothing, health care, education & employment for ALL people.

May we, each of us, promote this goal.
